

TM TRANS MOBILE INSTALLER- CARRIER

- Compact universal machine able to handle complete pallets of up to 1500kg
- Back saving installation of kerbs, slabs etc by means of the integrated vacuum laying unit
- The vacuum turbine is driven by the same Honda engine that drives the tracks
- Mast and boom are fully adjustable
- Dead weight of the TM is only 1300kg so transportation to and from site can be done with a car trailer
- The TM is designed with Health and Safety regulations as a guiding principle.

Judges' Comments

“ The judges appreciated this machine’s versatility, which enables tasks to be carried out more efficiently on site and on all kinds of terrain. They felt that hirers could add the unit to their fleets to offer a complete installation solution, while also enabling customers to comply with appropriate manual handling legislation.”
